

ASX ANNOUNCEMENT

SAYONA
MINING LIMITED

16 AUGUST 2016

PORTFOLIO RATIONALISATION TO FOCUS ON AUTHIER LITHIUM DEVELOPMENT

Sayona Mining Limited (ASX: SYA) ("Sayona" or the "Company") advises that the Option-to-Purchase agreement announced on the 18 December 2015 to acquire the Itabela graphite project from Brasil Graphite SA will not be renewed.

Following an extensive exploration program in early 2016, drilling was unable to define a resource of sufficient scale to meet the Company's financial return objectives. Coupled with a recent moderation in graphite concentrate prices, the Company has not been able to negotiate suitable new contractual terms to justify extending the purchase option.

The Company's primary focus will be on advancing its recently purchased Authier lithium project in Quebec, Canada. The Company recently reported a JORC mineral resource for Authier, a near-term development project and cash-flow generation opportunity. The Company believes Authier will create significant share value-uplift potential for shareholders as the project is advanced towards development.

The Company continues to hold an exposure to the graphite sector through its East Kimberley project in Western Australia including, an extensive tenement package totalling 278km² in close proximity to Hexagon Resources Ltd (market capitalisation \$34 million) high-purity Macintosh graphite project. Macintosh has demonstrated the capacity to produce high-grade concentrates and graphene¹ from graphite in the province. One drilling campaign has been completed at Corkwood within a six kilometre section of a structure that extends for approximately 20 kilometres. A second diamond drilling campaign is being planned to confirm the graphite grade, distribution, and flake quality and provide core for metallurgical testing.

Corey Nolan, Chief Executive Officer, commented "The Company's strategy is to invest in projects which it believes generate the highest return to shareholders. Our primary focus is now on the development of the Authier lithium project and identifying strategies for realising value from our other project interests".
